

2 part split frame Duplex THREE ROOMS - ONE FRAME - ONE DOOR LEAF

The Duplex frame solution allows three rooms to be served with just one door element. An innovative solution for open plan layouts of bedroom and bathrooms. The door leaf can be closed in two directions, so that the WC area for example can be straightforwardly separated.

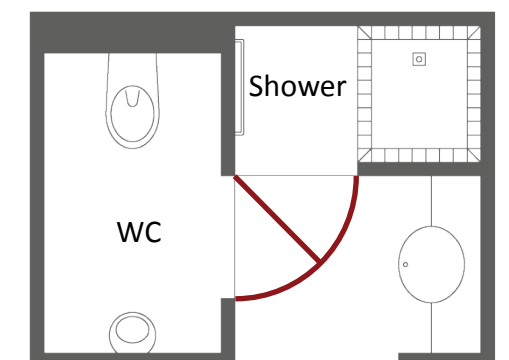

With this element one door is saved. This reduces costs and increases efficiency, as the space required for the pivoting range of a further acting leaf door is rendered unnecessary. This allows for innovative and open room concepts.

With flush closing door leaf,
version for stud walls.
